

Summary

Senior front-end developer & user experience enthusiast

I have 10+ years of experience using technology to solve **human problems**, empowering all types of people. I make **accessible, intuitive** interfaces that delight users, and I've been using **JavaScript** frameworks like **React/Next.js** and **Vue/Nuxt** to modernise web experiences.

I **organise** with other frontenders in my company to apply **best practices** within my team and across the company, and I enjoy engaging with the development community and **give talks** at **meetups and conferences**.

I'm looking for a role in a **diverse, multidisciplinary team** where I can support a **strong design vision** that's **driven by user needs**. I'm moving from London back to Australia and want to work in an environment where my team is **passionate** about our goals and where we feel **empowered** to make decisions.

Technical Skills

- **Proficient:** HTML, CSS, JavaScript, React, Next.js, Vue, Nuxt, Webpack
- **Knowledgeable:** Node, Gulp, NPM, Yarn, Git, PHP, Drupal 7 & 8, WordPress, Twig
